Fundamental Concepts of the 2000 Campus Master Plan

1. *Protect the Valleys*
2. *Develop Campus Edges and Entrances*
3. *Ensure Wayfinding and Accessibility*
4. *Plan Alternate Forms of Transportation*
5. *Distribute Parking*
6. *Connect the Campuses*
7. *Preserve Open Space*
8. *Develop Districts*
9. *Create Campus Activity Hubs*
10. *Distribute Housing*

Campus Facts & Campus Planning

2009 aerial photo of West Campus

Campus lands total over 1,200 acres. There are 151 buildings and 8.8 million square feet of building space.

This includes:

Main Campus	606 acres
Parkview Campus	276 acres
Asylum Lake Preserve ..	274 acres

The Planning Division of Facilities Management at WMU is responsible primarily for

- Facility Planning
- Campus, or Master, Planning
- Space Management

Facility Planning is the process of connecting the users of a physical space with the people who manage and maintain it, and with the architects and designers who construct it.

Master Planning deals with the entire physical campus, not just individual buildings or spaces. It looks at how successfully the physical space of the campus supports the university's goals, mission and obligations.

Space Management is the process of tracking, analyzing, and managing the built resources of the university

The Planning Division of WMU Facilities Management maintains a **Campus History** website

www.cf.wmich.edu/

that provides a wide variety of information, maps and photographs about the physical development of the WMU campus.
