

*THE RECENT and highly successful renovation of Walwood Hall demonstrates how an older building can assume new functions.*

#### **Architecture**

- **Uses** The Master Plan recommends that administrative support functions be relocated to the original and historic Western State Normal School buildings. Other suggested uses, such as University archives, museums and art galleries serving the Kalamazoo community, warrant consideration.
- **Demolition** The removal of the Speech and Hearing Center, when appropriate, is also recommended to allow for the expansion of parking and open space.

#### **Circulation**

- **Arrival Zone** A major arrival zone is recommended at the convergence of Stadium and Oakland Drives. This site should include expanded open space and a significant campus arrival sign and plaza. The plaza might include a fountain.
- **Oliver Street** The realignment of Oliver Street and a bridge over Oakland Drive (vehicular, pedestrian and bicycle) can improve vehicular circulation and provide a safe and convenient linkage.
