

## Miller Auditorium

### Building Vision

We have a vision to open and expand Miller's lobby space. This expansion would include both the main floor and the grand tier level. The main floor lobby would be expanded by using the space where the current ticket office and the house manager's offices are. We would need to relocate the ticket office and the house manager office to a new location.

On the Grand Tier level, we envision expanding the lobby by building a large glass room where the current veranda (Porch) is located overlooking the Miller Plaza. The room will hopefully be able to seat 150 people and have a small staging and bar area for catering. We would like to use this new room to entertain large groups of patrons and supporters. The view overlooking the plaza will be very imperative to set the proper mood and atmosphere for a grand occasion. Patrons now have expectations of certain amenities and service. Miller wants the ability to make a night at the theatre a memorable experience with receptions and special events.

We also would still like a veranda for concerts in the plaza since we have the power needed to accommodate a large concert and would like to keep some kind of a staging area outside.
